

# Installation

## Planning

Before installing your SiriusXM Business Radio, you will need to consider the following:

- How will you connect the Radio to the Internet, wired or wireless?  
**SiriusXM strongly recommends a wired internet connection for all business installations.**
  - If your network requires a static IP, consult a professional installer.
  - If wireless, and if the network is secured, you will need to know the wireless network name (SSID) and the password/key to connect to it.
- If you will be connecting the audio from the Radio to another device such as a stereo system or a phone system, you will need to locate the Radio in close proximity to your device so you can connect the audio cable(s).
- If you are connecting the audio to a device, what audio impedance does the device require? Most devices use 8 ohms, but some IP based phone systems may require the 600 ohm setting.

The following sections provide the installation procedure.

## Step 1: Subscribe to the SiriusXM Music for Business Internet Service

To listen to the SiriusXM Music for Business Internet Service, you will need to subscribe to the service. Call **1-866-345-SIRIUS** (7474) to subscribe and obtain your SiriusXM username and password (credentials).

**Your subscription is governed by our Customer Agreement which you will find at [http://www.siriusxm.com/pdf/siriusxmbiz\\_customeragreement\\_eng.pdf](http://www.siriusxm.com/pdf/siriusxmbiz_customeragreement_eng.pdf).**

# Installation

Please be sure to read it. **Service automatically renews into the subscription Package you choose, for additional periods of the same length, and automatically bills at the then current rates, after any complimentary trial or promotional period ends, until you call us at 1-866-345-7474 to cancel.**

## Step 2: Connect the Radio

These instructions are for a wired connection to the Internet. **SiriusXM strongly recommends a wired internet connection for all business installations.** An Ethernet cable is included. If you are using a wireless Internet connection, skip the first step.

1. Connect the Ethernet cable to the **LAN** connector of the Radio. Connect the other end to your Internet access point.
2. Connect the Power Adapter to the **DC 5V** connector, and plug the Power Adapter to an AC outlet. The Radio will power on automatically.
3. After a few moments, the Radio will attempt to connect to the network. If the network connection fails with a **Network Error** message, check the connection to your access point. If you are using a wireless Internet connection, refer to "Wireless Network Configuration" on page 24 and complete the wireless network connection procedure before continuing.
4. If the Radio has successfully connected to the network, and has Internet connectivity, the Main Screen will be displayed.
5. Connect the Radio to your audio system using the provided Stereo Audio Cable or

Mono Audio Cable. Connect the Stereo Audio cable to the **Audio Out (L) (R)** (white and red) connectors, or the Mono Audio Cable to the **Mono Out** connector (green).

6. Set the **Impedance Switch** to the correct impedance for your audio system. Most devices use the 8 ohms setting, but some IP based phone systems may require the 600 ohm setting.

## Step 3: Enter Your SiriusXM Credentials

1. From the Main Screen, turn the **Scroll knob** to the right to highlight **Settings** and press the knob to select.
2. Turn the **Scroll knob** to highlight **Credentials** and press the knob.
3. First enter the username that SiriusXM provided to you. The username is case sensitive. Turn the **Scroll knob** right and left to select a letter or number and press the knob to select the letter. If you make a mistake, press the **BACK** button to erase the last entry.
4. Continue until you have finished entering the username. Then turn the **Scroll knob** until **END** is displayed and press the knob.
5. The Radio will display **LOADING...** while the username is being verified. **Username updated** will be briefly displayed if you entered the correct username. If you have entered an incorrect username, **Username does not exist** will be displayed. You will need to correct the username.
6. Next you will be prompted to enter your password. Enter your password in the

# Installation

same way as you entered your username. The password is also case sensitive. Then turn the **Scroll knob** until **END** is displayed and press the knob.

7. After your password has been entered and successfully verified, you will be returned to the settings screen. Press **BACK** to return to the main display screen.

## Step 4: Set the Clock

1. If you are not in the Settings menu, then from the Main Screen turn the **Scroll knob** to highlight **Settings** and press the knob to select.
2. Turn the **Scroll knob** to highlight **Clock set-up** and press the knob.
3. **Time Zone** will be highlighted. Press the **Scroll knob** to select and turn it to highlight your time zone. Press the **Scroll knob** again to select your time zone.
4. Next you will be prompted to set the time. The time is set automatically, so press the **Scroll knob** until you are prompted to set the date.
5. You will be prompted to set the date. The date is set automatically, so press the **Scroll knob** until you receive a confirmation message that the time and date have been set.
6. By default, Daylight Savings Time (DST) is set to on and will automatically adjust the time. If Daylight Savings Time (DST) is not observed in your time zone, turn the **Scroll knob** to highlight **Daylight Savin** and press the knob.
7. Turn the **Scroll knob** to highlight **None** and press the knob. You will receive a confirmation that DST is off.
