Configuring the Business Internet Radio

Factory Reset

The Factory Reset option restores the Business Internet Radio to the factory settings. It will erase all the stored network settings, SiriusXM for Business streaming username and password, favorite channels, favorite shows and channels, alarm clock settings, and set all other options back to the factory settings.

1. Press the **Home** button and turn the **Scroll knob** to highlight Setup. Press the **Scroll knob** to select.

2. Turn the **Scroll knob** to highlight Factory reset and press the **Scroll knob** to select.

3. Confirm that you really want to proceed with the factory reset. Confirm factory reset will be highlighted. Press the **Scroll knob** to proceed with the factory reset, or press the **BACK** button to abort the factory reset.

4. The screen will display "Restoring factory defaults", restart the Business Internet Radio when complete and display "Please press the POWER button".

Note that you will have to connect the Business Internet Radio to a network ("Step 1: Connect to the Internet" on page 8), and also enter your SiriusXM for Business username and password ("Step 2: Enter Your SiriusXM for Business Streaming Account Information" on page 11) after performing a Factory Reset.
